

## STEAMPunks

STEAMPunks currently run classes for pre-school children, covering a wide range of topics inspired by the CfE science outcomes.

Each class follows a theme and offers hands-on experiences for children and carers to get to grips with science concepts and develop their curiosity and creativity!

### About Us

Lindsay created and runs the STEAMPunks classes.

She is a qualified chemistry and biology teacher, with over 15 years teaching experience. Although she has mostly taught at secondary school level, she has also had the privilege to teach in primary and nursery classes as a science specialist. She enjoys teaching at every level, from pre-school to advanced higher, and loves sharing her enthusiasm for science with everyone!

*"An exciting and educational class, led by an enthusiastic teacher. We had so much fun!"*

*Leigh A*

# STEAMPunks Science Workshops

Delivering the science curriculum to early years.

# Developing curiosity and creativity!

## Topics

Each of the workshops focuses on a theme linked to Early Years CfE outcomes (level 0/1), and occasionally level 2. Some of the themes we cover are listed below, but if there is an area you would like to explore, we are always open to suggestions!

- Things that go! (Forces and energy)
- Living and non-living things
- Sound (vibrations and waves)
- Body systems
- Materials and properties
- Chemical Reactions
- Water cycle
- Seasonal themes
- Celebration theme (Halloween, Christmas, Easter etc)

## Our Services

The workshops can be tailored to suit your needs, and you can select from the wide range of topics on offer or simply choose to have a session full of fun science demonstrations and activities to excite and enthuse!

**30**  
min

30 minute sessions would be mostly demonstration based with some audience participation (£50)

**60**  
min

A 60 minute session allows you to have a mixture of demonstrations and activities for all the children to get involved with. (£100)

**block**  
**book**

Another option is to book a block of sessions (30 or 60 minutes) to cover a range of topics that you would otherwise find difficult to fit into your schedule. (Discounts are offered for block booking.)

*'It is a wonderful experience having Steampunks Science come and be part of our nursery. Lindsay brings a wealth of knowledge and experience and the children are engaged and enthralled with the learning and experiences offered. I would thoroughly recommend Steampunks Science.'*
